TO CARRY OUT A BASIC RISK ASSESSMENT

FOLLOW
THE FOUR
STEPS

INFORMATION Gather information about each hazard identified.

What information do you have on each hazard?

STEP 2: LIKELIHOOD

Think about how many people are likely to be exposed to each hazard and for how long.

You need to take into account the different situations/conditions that may exist in your workplace that may increase the likelihood, such as a change to operations, inspection, cleaning, maintenance, servicing and repair, new or inexperienced staff. **STEP 3: CONSEQUENCES**

Use the information to assess the consequences of each hazard. Consider extent/ severity of injury.

Monitor and review the risk controls

It is important to monitor risk controls and review risk assessments regularly. Review is required when there is a change in the process, relevant legal changes, and where a cause for concern has arisen. If the risk assessment has substantially changed a new risk assessment is warranted.
